A prearrangement plan from your family-owned funeral home is the right choice.

Everything with a beginning has an ending.

All through your life you have made decisions with your family's best interests in mind ... providing a home, saving for college, and taking out insurance. You have prepared for tomorrow by thinking of today. Prearranging your funeral is yet another way to show your family how much you care.

A funeral is probably the last thing you or your family want to think about today, but the stress can be overwhelming when making decisions regarding the specific wishes of a departed loved one. Take the time now to consider prearrangement with a Pathway prearrangement plan and your local funeral home.

If you don't, someone you love dearly will have to face these difficult decisions later, at a time of great emotional and financial strain.

The Pathway plan and your local funeral home will assist you in making emotional decisions free from the hardships of bereavement. Making your wishes known in advance will help your loved ones carry them out. Grief will not be compounded by confusion.

Pathway will also allow you to arrange a funeral at today's prices, thus avoiding escalating costs. A later financial expense can be avoided at a time when family finances might be uncertain.

Because you care, you owe it to your loved ones to make the wise choice of prearranging your funeral with the right choice – your local funeral home and Pathway.

The celebration of YOUR life is an important event!

Gathering, caring, and sharing allow us to support each other and help us cope with a loss. It also further acknowledges a life has been lived and is worth remembering.

When men and women of stature die, our society (*the world at large*) recognizes the need and value of a ceremony to commemorate their existence. Princess Diana, President Reagan, and Pope John Paul II are all examples of this fact. Ask yourself, what would it have been like if there was no ceremony? Shouldn't your family and friends have this opportunity?
